Cat's Claw

V Ve

Wildcrafted Cat's Claw (<<ITon>>Uncaria tomentosa<<IToff>>) Inner Bark

A botanical from the Peruvian rainforest, Cat's Claw, or "Una de Gato", is rich in active phytochemicals, including alkaloids, polyphenols, glycosides, and plant sterols. Cat's Claw has been used for centuries in traditional medicine by tribes of the Amazon; modern research indicates it is useful for supporting immune function and tissue repair, and is a potent antioxidant.

Ingredients:

Each capsule typically contains:

Cat's Claw (Uncaria tomentosa) 500 mg

Encapsulated with:

Gelatin
Magnesium stearate

Features:

Cat's Claw is extremely rich in active phytochemicals, and has been shown to be a potent adaptogen and digestive tonic.

Cat's Claw contains specific alkaloids known as oxindole alkaloids. Isopteropodine is an oxindole alkaloid found naturally in Cat's Claw, which supports immune function by modulating cytokine production and supporting optimal phagocytosis.

The inner bark of the vine stem is harvested for this product.

Recommendation: 1-2 capsules three times daily with meals, or as directed.

Caution: Not recommended during pregnancy or whilst breastfeeding. Not recommended for organ transplant recipients or individuals suffering from autoimmune diseases.

Product Code: 3210

Package Size: 90
