

Product Information Sheet

Gastrointestinal Support

GiSol

Saccharomyces Boulardii

Saccharomyces boulardii is a non-pathogenic yeast which has been shown to support a healthy balance of flora in the gut.

Ingredients:

Each capsule typically contains:

Saccharomyces boulardii

1.5 billion organisms*

*at date of expiry

Encapsulated with:

Ascorbic acid

Mannitol

Magnesium stearate

Silicon dioxide

Natural vanilla flavour

Features:

S. boulardii is recognised to have probiotic effectiveness when used alone and/or in combination with other probiotics to support digestion.

S. boulardii is a unique probiotic in that it is known to survive gastric acidity, and is not adversely affected or inhibited by antibiotics. For this reason good friendly probiotic organisms (including Lactobacillus and Bifidobacterium) can be taken at the same time as S. boulardii.

Recommendation: 2 capsules daily, or as directed.

Caution: Must not be taken by organ transplant recipients. Not suitable for patients with a weakened immune function (immunocompromised).

Contains ingredients derived from:

Milk

Product Code: 3294

Package Size: 30
