Mitochondrial Resuscitate

V Ve

Krebs Cycle Support Formula with Key Antioxidant Nutrients

The mitochondria is sometimes referred to as the "powerhouse" of the cell, and for good reason, as the mitochondria houses the electron transport chain which is responsible for creating ATP, the source of all energy in the body. Mitochondrial Resuscitate contains important nutrient cofactors while providing significant antioxidant protection.

Ingredients:

Each tablet typically contains:

Magnesium (as bisglycinate, oxide)	50 mg
Vitamin C (as ascorbic acid)	50 mg
Creatine monohydrate	100 mg
Alpha-lipoic acid	50 mg
L-Glutathione	50 mg
N-Acetyl-Cysteine	50 mg
Vitamin E (as d-alpha tocopheryl acetate)	24 mg
N-acetyl-L-carnitine	30 mg
Vitamin B1 (as thiamin mononitrate)	4.2 mg
Vitamin B2 (as riboflavin)	4.8 mg
Co-Enzyme Q10 (ubiquinone)	5 mg
Grape Skin Extract (<i>Vitis vinifera</i>)	5 mg

Tableted with:

Magnesium stearate
Sodium carboxymethylcellulose
Microcrystalline cellulose
Polyvinylpyrrolidone
Cottonseed oil

Features:

Provides potent antioxidant protection from vitamins C and E, glutathione, NAC, lipoic acid, CoQ10 and the polyphenols found in grape seed extract.

Ascorbic acid is a form of vitamin C especially bioavailable to the membranes in the mitochondria.

Thiamin (B1) and riboflavin (B2) support the catabolism of carbohydrates, fats and protein into energy.

Magnesium is a cofactor in glycolysis and the citric acid (Krebs) cycle.

CoQ10 is a direct carrier of electrons in the mitochondria, necessary for ATP production.

N-Acetyl-L-Carnitine helps transport long chain fatty acids into the mitochondria for conversion into energy.

Recommendation: 1 tablet twice daily, or as directed.

Caution: Safety has not been established during pregnancy or whilst breastfeeding.

Contains ingredients derived from: Soy (oil)

Product Code: 3520

Package Size: 50
