Of which: Saturates	<0.02 g
Fibre	0.26 g
Sodium	0.88 mg

*Detailed information on CARICOL® can be obtained at www.caricol.com

Other ingredients:

Citric acid
Natural flavours

Features:

The name CARICOL® is derived from:
CARIca papaya L. - the latin name for papaya.
COL - colon, where it has its predominant effect.

Papaya fruit is naturally high in papain, a potent proteolytic enzyme. Proteolytic enzymes support the breakdown of proteins.

Papaya supports optimal bowel function. It has also been shown to have soothing effects on the stomach and digestive tract.

A well functioning digestive system is necessary to provide vital nourishment and energy for the mind and body.

Optimum function of the digestive system is also an essential prerequisite for a resilient immune system. A healthy digestive system supports metabolic clearing and healing processes in the body.

The preparation of the fruit and the recipe originate at the Lotus Buddhist Monastery on Big Island, Hawaii.

Over 26 grams of fresh papaya is used to make each individual stickpack.

Recommendation: 1 stickpack serving after a meal, up to three times daily, or as directed. Take with a glass of water on the side, or dissolved into water as a fruit beverage.

Caution: None known if directions are followed.

Product Code: 3650

Package Size: 20 x 20 ml individual stickpacks
