Features:

Ideal nutritional support for individuals who wish to add a high quality protein to their diet.

Naturally occurring immunoglobulins support the activity level of the immune system and also help to support efficient intestinal function.

The standardised process ensures a consistent immunoglobulin concentration from batch to batch.

Recommendation: Mix 2 scoops with a cold beverage, or add to your favourite recipe once daily. To prevent protein denaturation and maintain the protein activity level, do not mix in hot drinks or recipes that require baking or boiling. Also, do not mix with pineapples or papayas because their enzymes may deactivate the protein.

Caution: This product contains vitamin A. Do not exceed 750µg of vitamin A (as retinol) per day if pregnant or likely to become pregnant except on the advice of a doctor or antenatal clinic.
