ActiFolate®

V Ve

Comprehensive Folate Nutrition

ActiFolate® is a proprietary blend of L-5-methyl tetrahydrofolate (L-5-MTHF), calcium folinate, and folic acid. This all-inclusive, bioavailable source of folate nutrition is perfect for patients who require general folate supplementation.

Ingredients:

Each tablet typically contains:

Folate 800 µg
(as folic acid, L-5-methyl tetrahydrofolate*, calcium folinate)

*As Metafolin® U.S. Patent Nos. 5,997,915; 6,254,904

Tableted with:

Microcrystalline cellulose
Stearic acid
Silica

Features:

Folic acid is essential for the growth, replication and differentiation of all cells in the body through its essential role in DNA synthesis.

Folic acid is essential for all protein synthesis through its essential role in RNA synthesis.

Essential for all methylation reactions, folic acid is necessary for neurotransmitter synthesis, nerve myelination, protein synthesis, metabolic clearing and carnitine synthesis.

Features L-5-MTHF, a body-ready, nature-identical folate that will not mask B12 deficiency and is the only folate that crosses the blood-brain barrier.

Ideal for people whose folate status may be affected by genetic variation.

Recommendation: 1 tablet daily, or as directed.

Caution: For most individuals folic acid is completely non-toxic. Patients using methotrexate as cancer or rheumatoid arthritis therapy should only use additional folic acid on the advice of a medical doctor.
