Gastrointestinal Support

Permeability Factors

L-Glutamine with NAG & Gamma Oryzanol for Intestinal Support

One of the many hazards of modern day living, poor nutrition and exposure to environmental toxins is susceptibility to intestinal permeability. When intact, the lining of the intestines provides a secure mucosal barrier against improperly digested food and toxins. When the intestinal lining is compromised, however, these undesirable substances can "leak through". Permeability Factors is a formula designed to help support the integrity of the gut lining.

Ingredients:

Each capsule typically contains:

GLA (gamma linolenic acid) (1)	135 mg
L-Glutamine	250 mg
N-Acetyl-D-Glucosamine (2)	125 mg
Gamma Oryzanol (3)	33 mg
Vitamin E (as d-alpha tocopheryl succinate)	8 mg
L-Methionine	1 mg

- (1) From blackcurrant seed oil. (2) Minimum concentration over 99% derived from natural marine sources.
(3) From rice bran oil.

Encapsulated with:

Gelatin
Magnesium stearate
Silicon dioxide

Features:

L-glutamine is the preferred fuel for small intestine enterocytes and helps support proper barrier function.

N-Acetyl-D-Glucosamine (NAG) is a building block of connective tissue and helps to support the gut's mucosal lining.

Gamma oryzanol (natural extract of rice bran oil) is a soothing plant substance, rich in phytosterols and ferulic esters.

Recommendation: 1 capsule one to three times daily between meals, or as directed.

Caution: Not recommended during pregnancy or whilst breastfeeding.

Contains ingredients derived from:

Soy
Crustaceans

Product Code: 5552

Package Size: 90
