

Multigenics™ Intensive Care Formula

features the same high quality ingredients found in Multigenics™, but is particularly suited to the elderly and the acute or chronically ill individual with reduced digestive function.

- Features the mineral complex and organic factors contained in microcrystalline hydroxyapatite concentrate (MCHC), and a 2:1 ratio of calcium to magnesium for optimum bone support.
- Provides 400 IU of vitamin D for those with reduced intake, less efficient intestinal absorption, or reduced biosynthesis of this important vitamin.
- Provides L-glutamine to support the integrity of the intestinal lining, which is important for optimal absorption of nutrients.
- Is available with or without iron.
- Available in extra value 180 tablet containers.

Multigenics™ Chewable

is a high quality multiple vitamin and mineral supplement with excellent nutrient bioavailability designed especially for children or for anyone who prefers a chewable tablet.

- Provides an essential, comprehensive foundation for optimal health in a delicious, "outrageously orange", chewable form.

- Delivers highly absorbable patented amino acid chelates, optimally balanced B vitamins, and broad-spectrum antioxidant protection.
- Contains Caro-xan™, a proprietary blend of beta-carotene and Betatene® mixed carotenoids for balanced antioxidant protection.

PROVEN AVAILABILITY

A PillCam™ (small please!) study on a group of patients with digestive impairment caused by gastric bypass surgery showed that Multigenics tablets break down in just 15 minutes. Gastric bypass patients swallowed a tiny camera contained within a capsule and the breakdown of the Multigenics tablet could then be observed. Despite the fact that the surgically reduced stomach had a deficiency of stomach acid we still see a full disintegration within 15 minutes. So, if you're worried about digestion and absorption of the nutrients, don't be!

Quality and Innovation Come as Standard

Integrity, quality and choice are the watchwords Metagenics® live by every day.

Quality includes three important elements:

- 1) the quality of the science behind the product
- 2) the quality of the ingredients that go into the product, and
- 3) the quality of the manufacturing process

Each Metagenics® formula undergoes extensive reviews by a team of clinical research experts to ensure that it reflects the latest in nutritional science and exceeds the highest Good Manufacturing Practices (GMP) standards in terms of quality, stability, and reliability.

Nutri are delighted to be able to bring these exceptionally high quality supplements to UK practitioners, especially the exciting Multigenics™ range of multivitamins/minerals.

An Excellent
Foundation For Health

The Multigenics™ Range

Imagine a supplement manufacturer that combined the expertise of modern molecular nutrition, the skills of traditional herbalists from India, China and Europe, and the quality control of space agency clean room. That's the kind of company Metagenics® is: an American supplement maker wholly devoted to helping individuals achieve their genetic potential through optimal nutrition. For over 20 years, the scientists, researchers and doctors at Metagenics® have been developing and clinically testing dietary supplements to help people get healthy and stay healthy. In fact, so potent are their nutritional and herbal formulations that they allow them to be dispensed to individuals only through qualified healthcare practitioners. Nutri Ltd shares Metagenics® passion for innovation, quality and purity in natural products and are delighted to be able to provide these exceptional products in the UK.

Comprehensive Foundation for Optimum Health

Few nutritional supplements are as important as a high-potency multivitamin and mineral supplement. By many expert estimates, the average modern diet falls far short of containing the recommended daily allowance for vitamins and minerals, despite eating 50-100% more calories than we need to thrive! What's more, the trend in eating under-nutritious food grows stronger as we get older, with some researchers finding that more than 75% of elderly populations are at severe risk of vitamin and mineral deficiencies. Sicker and older individuals show far more severe nutritional deficiencies in their diet than healthier individuals, and a simple multivitamin and mineral can go a long way to supporting them.

Choose Multigenics™ for Optimal Results

As you are probably aware, not everyone needs the same identical multivitamin and mineral supplement. Metagenics® make numerous Multigenics™ formulations to help meet each individual's unique biochemical needs. Most adult, menstruating women, for instance, need additional iron since blood and iron as haemoglobin are lost with each menstrual period. However, post-menopausal women and men are generally better off with Multigenics™ iron free formula. Likewise some patients may be seriously ill and have difficulty with normal digestion and absorption. For these patients, the Metagenics® team has developed Multigenics™ Intensive Care with superior absorbability and added glutamine to foster improved absorption functions. And of course, children want something a little more exciting in a vitamin and so the "outrageously orange" Multigenics™ Chewable was created.

It is useful to note that most Metagenics® multivitamins come in 2 sizes, 90 and 180, which means that those wanting extra value can stock up on the larger size. Many people benefit from the larger volume when they are taking these products long-term, which is how Multigenics™ formulas are designed to be taken. Metagenics® have a Multigenics™ formula designed to meet your unique needs.

Multigenics™

is a comprehensive high-potency multiple vitamin and mineral formula suitable for adolescents, adults, and seniors that provides an essential, complete foundation for optimal health.

- Optimally balanced B vitamins with extra B12 to support energy production and methylation.
